JAVA PLACEMENT TRAINIG - DAY 1: TASKS

1.BONUS CALCULATION

```
import java.util.*;
class bonus{
    public static void main(String[]args){
        Scanner sc=new Scanner(System.in);
        System.out.print("Enter your experiance: ");
        int exp=sc.nextInt();
        System.out.print("Enter your Salary: ");
        int sal=sc.nextInt();
        if(exp>5){
            sal=sal+(sal*15/100);
            System.out.println("salary with bonus: "+sal);

        }
        else if(exp>=3){
            sal=sal+(sal*10/100);
            System.out.println("salary with bonus: "+sal);
        }
        else{
            sal=sal+(sal*5/100);
            System.out.println("salary with bonus: "+sal);
        }
    }
}
```

2.CASH WITHDRAWL:

```
import java.util.*;
class bonus{
    public static void main(String[]args){
        Scanner sc=new Scanner(System.in);
        System.out.print("Your balance is: ");
        double bal=sc.nextDouble();
        System.out.print("Enter you withdrawal amount: ");
        double withdrwal=sc.nextDouble();
        if(bal>=withdrwal){
            System.out.println("cash Deducted: "+withdrwal);
            System.out.println("Your Current Balance: "+ (bal-withdrwal));
```

```
    }
    else{
       System.out.println("Insufficient Balance");
    }
    }
 }
```

3.DISCOUNT PROGRAM

```
import java.util.*;
class discount {
   public static void main(String[]args){
      Scanner sc=new Scanner(System.in);
      System.out.print("Enter the Total Amount: ");
      double amount=sc.nextDouble();
      if(amount>5000.00){
         System.out.println("Your Discount: "+(amount-
(amount*20/100)));

      }
      else if(amount>2000.00){
         System.out.println("Your Discount: "+(amount-
(amount*10/100)));
      }
      else {
         System.out.println("No discount For You");
      }
      }
}
```

4.TRAFFIC SIGNAL

```
import java.util.*;
class TRAFFIC {
   public static void main(String[] args) {
      Scanner sc = new Scanner(System.in);
      System.out.print("ENTER THE SIGNAL: ");
      String color = sc.nextLine();
      switch (color) {
         case "RED":
            System.out.println("STOP");
            break;
```

```
        case "YELLOW":
          System.out.println("GET READY");
          break;
        case "GREEN":
          System.out.println("GO");
          break;
        default:
          System.out.println("Invalid signal");
          break;
      }
    }
}
```

5.SIMPLE CALCULATOR

```
import java.util.*;
class Calculator {
  public static void main(String[] args) {
    Scanner sc = new Scanner(System.in);
    System.out.print("Enter Your value 1: ");
    int a = sc.nextInt();
    System.out.print("Enter Your value 2: ");
    int b = sc.nextInt();
    System.out.print("Enter Your operation: ");
    sc.nextLine();
    String opr = sc.nextLine();
    switch (opr) {
      case "+":
        System.out.println(a + b);
        break;
      case "-":
        System.out.println(a - b);
        break;
      case "*":
        System.out.println(a * b);
        break;
      case "/":
        System.out.println(a / b);
        break;
      default:
        System.out.println("Invalid Operation");
        break;
```

```
        }
    }
}
```

6.ODD OR EVEN NUMBER FINDING

```
import java.util.*;
class EvenNumbers{
    public static void main(String[] args) {
    Scanner sc=new Scanner(System.in);
    int num=sc.nextInt();
      for(int i=1;i<=num;i++){
         if(i%2==0){
      System.out.println(" Even number : "+i);
         }
else{
        System.out.println(" Odd number : "+i);
   }
}
}
}
```

7.GRADE SYSTEM

```
import java.util.*;
class Grade{
   public static void main(String[]args){
      System.out.println("Enter your marks : ");
      Scanner sc=new Scanner(System.in);
      int s1=sc.nextInt();
      int s2=sc.nextInt();
      int s3=sc.nextInt();
      int s4=sc.nextInt();
      int s5=sc.nextInt();
      int avg=(s1+s2+s3+s4+s5)/5;
      System.out.println("AVERAGE MARK: "+avg);
      if(avg>=90){
         System.out.println("Grade : A+");
      }
      else if(avg>=80){
         System.out.println("Grade : A");
      }
      else if(avg>=70){
```

```
            System.out.println("Grade : B");
        }
        else if(avg>=60){
            System.out.println("Grade : C");
        }
        else if(avg<60){
        System.out.println("Fail");
    }
    else{
        System.out.println("Invalid Mark");
    }
}
}
```

8. ELECTRICITY BILL

```
import java.util.*;
class EBill{
    public static void main(String[] args) {
        int amt=0;
        int tamt=0;
        Scanner sc = new Scanner(System.in);
        int unt=sc.nextInt();
        if(unt<=100){
            System.out.println(""+unt*5);
        }
        else if(unt>100){
            System.out.println(""+100*5);
            amt+=100*5;
            unt-=100;
            if(unt<=200){
              System.out.println(""+unt*7);
              amt+=unt*7;

            }
            else if (unt>200){
                amt+=200*7;
                unt-=200;
                System.out.println(""+amt);
                if(unt>=0);{
                 amt+=unt*10;
                 System.out.println(""+amt);
                }
```

```
            }
        }
        if(amt>=2000){
          tamt=amt+(amt/100)*20;
        }
        System.out.println(""+tamt);

    }
}
```

9.LEAP YEAR

```
import java.util.*;
class Main{
    public static void main(String[]args){
        Scanner sc=new Scanner(System.in);
        System.out.print("Enter the year: ");
        int num=sc.nextInt();
        if(num%4==0&&num%100!=0||num%400==0){
            System.out.println(num+" is a Leap Year");
        }
        else{
            System.out.println(num+" is Not a Leap year");
    }
}
}
```

10.AREA & PERIMETER OF THE RECTANGLE

```
import java.util.*;
class Main{
    public static void main(String[]args){
        Scanner sc=new Scanner(System.in);
        System.out.print("Entet the length of the rectangel: ");
        int l=sc.nextInt();
        System.out.println();
        System.out.print("Enter the breadth: ");
        int b=sc.nextInt();
        System.out.println("AREA OF THE RECTANGLE: "+l*b);
        System.out.println("PERIMETER OF THE RECTANGLE: "+
2*l+b);
    }
```

```
}
```
